Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The claimed invention is directed to a method for effecting computer implemented decision-support in selection of a drug therapy of patients having HIV. The method comprises using a rules database, wherein each rule indicates the suitability of the drug for treatment of a specific HIV genotype, and wherein the suitability indication of the rules is based on at least a combination of a first value indicating the resistance level of the genotype for the drug and a second value indicating the confidence in the first value.

The first value for resistance level is construed as what is defined in the specification on page 5: "The resistance level is represented on a scale from 0 (low resistance) to 3 (high resistance)." The second value for confidence level is construed as what is defined in the specification on page 6: "A confidence level has one of the three following levels: (1) suggestive evidence, (2) proven in vitro, (3) proven in vivo."

The prior art does not teach or suggest a method as claimed comprising using a rules database wherein the suitability is based on both the resistance level and the confidence level on the resistance level, and does not teach or suggest a method as claimed wherein the resistance level is represented on a scale from 0 to 3.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
